## WINTER LEAGUE MATCH-PLAY HANDICAP CALCULATIONS

### UNDER WHS RULES

In four ball, better-ball match-play competitions, each player's *Playing Handicap* is calculated by taking 90% of their *Course Handicap*.

Strokes are then taken by calculating the difference between each player's *Playing Handicap* and the *Playing Handicap* of the lowest player in the group.

The lowest player receives no strokes.

**Example:** (Forrester Park, white tees)

Player	H'cap INDEX	COURSE H'cap	PLAYING H'cap (90%)	Strokes Recv'd
A	8.4	10	9	0
B	12.9	15	14	5
C	16.0	19	17	8
D	18.4	21	19	10
